allocates fixed chunks of the day to specific subjects, aligning study periods with natural energy peaks—often mid—morning for most students. Pomodoro splits work into 25—minute bursts followed by short breaks, which can be helpful for tasks that feel overwhelming, such as dense reading assignments. Research from the Journal of Educational Psychology shows that students who combine both—using larger blocks for deep work and Pomodoro for review—report a 15 % increase in retained material. Passive review (re—reading notes) yields low long—term retention. In contrast, active recall—testing yourself with flashcards or practice questions—forces the brain to retrieve information, strengthening neural pathways. A 2022 study at a peer Southern university demonstrated that students who incorporated a daily 10—minute self—quiz outperformed peers who only highlighted texts by an average of 0.7 GPA points. Spaced repetition distributes study sessions over increasing intervals, capitalizing on the spacing effect. Cramming compresses learning into a single marathon session, often leading to short—term recall that evaporates before finals. The University of Alabama’s tutoring center now integrates spaced—repetition software into its math workshops, reporting a 22 % reduction in repeat—visit rates for struggling students.
